RED RIVER BASIN WILDLIFE AND WATER QUALITY ENHANCEMENT PILOT PROGRAM

PARTICIPATING COUNTIES: Cass, Grand Forks, Griggs, Ransom, Richland, Sargent, and Walsh

The primary objectives of the program are to increase wildlife habitat and improve water quality in the Red River Valley.

Marginally productive croplands (e.g., saline areas, flood prone sites, etc.) are the primary focus of the program.

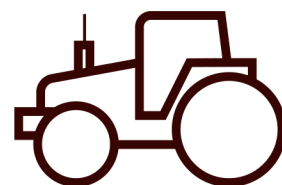

ELIGIBLE PRACTICES INCLUDE

NATIVE & INTRODUCED
GRASS PLANTINGS

POLLINATOR
PLANTINGS

RIPARIAN BUFFERS
GRASSED WATERWAYS
FILTER STRIPS

Participating Soil Conservation Districts will deliver the program locally and help producers determine practices for marginally productive croplands.

PAYMENTS

60%
COSTS
COVERED

COST SHARE

40% of costs will be the responsibility of the producer.

MANAGEMENT AND MAINTENANCE

In addition to practice cost share, producers are also eligible to receive rental payments for select practices.

For more information on the program contact your local Soil Conservation District.
